

Business Performance Report

Project Overview

This dashboard was developed using **Power BI** to analyze sales performance, profitability, customer trends, and regional performance. The dashboard provides interactive insights through KPI cards, charts, tables, and slicers to support business decision-making.

Key Performance Indicators (KPIs)

KPI	Value
Total Sales	1.41M
Total Profit	172.99K
Growth %	-23K
Total Customers	6K

Interpretation

- The business generated **1.41 million** in total sales.
- Total profit reached **172.99K**, indicating overall profitability.
- The Growth KPI is negative, suggesting that sales performance declined compared to the previous period and requires further investigation.
- The customer base consists of approximately **6,000 unique customers**.

Sales Analysis

Monthly Sales Trend

- Sales fluctuated throughout the year.
- January and February recorded relatively lower sales.
- A significant increase occurred in March.
- Sales remained fairly stable during the middle of the year.
- Strong growth was observed in September, followed by another peak in November and December.

Business Insight:

Sales performance strengthens during the final quarter, indicating seasonal demand or successful promotional campaigns.

Regional Sales Performance

Sales by Region:

- West – Highest sales
- East – Second highest
- Central – Moderate sales
- South – Lowest sales

Business Insight:

The West region is the company's strongest market, while the South region presents opportunities for improvement through targeted marketing and sales initiatives.

Regional Profit Analysis

Profit by Region:

- West generated the highest profit.
- East closely followed.
- Central delivered moderate profitability.
- South produced the lowest profit.

Business Insight:

Although all regions contribute to profitability, improving profit margins in the South should be a strategic focus.

Dashboard Features

The report includes:

- KPI Cards
- Monthly Sales Trend Analysis
- Regional Sales Comparison
- Regional Profit Analysis
- Top Customer Ranking
- Interactive Slicers
 - Month
 - Year
 - Region

These filters allow users to explore business performance across different periods and regions.

Strategic Recommendations

1. Increase investment in the **West** region to maintain market leadership.
2. Investigate the reasons behind the **negative growth** and implement corrective actions.
3. Develop targeted marketing strategies for the **South** region to improve both sales and profitability.
4. Focus on retaining top-performing customers through loyalty programs and personalized offers.
5. Analyze monthly demand patterns to better plan inventory and promotional campaigns during peak sales periods.

Conclusion

The Power BI dashboard successfully transforms raw sales data into meaningful business insights. By monitoring KPIs, regional performance, customer contributions, and sales trends, management can make informed decisions to improve revenue growth, profitability, and customer satisfaction.

This project demonstrates practical skills in:

- Power BI Dashboard Development
- Data Visualization
- KPI Design
- Business Intelligence Reporting
- Sales & Profit Analysis
- Interactive Filtering and Reporting
- Join Sql Query
- Excel
